HOXHUNT

Security awareness training employees choose to complete

Deliver role-relevant, branded learning, with insights that steer your program to real risk reduction.

With Hoxhunt SAT, employees want to complete their training — and you get the tools, insights, and credibility to drive a security culture that leadership values.

An employee experience that earns earns you credibility

- **Training feels relevant:** Target by role, difficulty, and tone so employees only see what matters to their job.
- **Formats people engage with:** Meet different learning styles to keep attention and retention high.
- **Familiar training look:** Build trust and reduce resistance with a familiar brand experience.
- **Accessible to everyone:** Remove language as a barrier and launch globally without extra lift.

A platform that enables your strategic strategic leadership

- **Address highest risks:** Serve targeted, relevant lessons to employees based on their roles' most critical security risks.
- **Scale without headcount:** Turn policies into global training with generative tooling, flexible distribution and clear tracking.
- **Build security culture:** Deliver on-brand training in your own tone, with lessons tailored to your organization's nuances.
- **Earn leadership's trust:** Report clear compliance outcomes across reach and completion, with insights to address gaps.
